Budget Game 預算大挑戰 · Teacher Guide 教師手冊

Printing & prep 列印與準備

Per team 每組	Pages	When
Groups & classroom map 分組 (1 p.) + Instructions 說明 (3 pp.) + Cut-out sheet 剪紙單 (1 p.)	1–5	Start of activity
Scenario 1–5 情境單	6–10	Hand out one at a time
Poster paper: 對開 (54 × 78 cm) or two A3 sheets taped, landscape; glue sticks; scissors		Bring

8 columns × 2.5 in (6.4 cm) cards ≈ 51 cm wide, so 對開 fits; on A3 tell teams to overlap cards slightly. Coins (1.9 in) sit under the cards; columns with many coins can wrap into a second column.

Timeline (60 min) 時間表

Time	Step
0:00–0:10	Form teams, assign roles, find groups on page 1, read pages 2–4, cut line cards and 16 coins, glue cards across the top.
0:10–0:17	Starting budget: glue 16 coins. Rules: every line ≥ 1, rent ≥ 2.
0:17–0:25	Scenario 1 · The 20% Cut (4 min decide, 3–4 min: 3 teams report)
0:25–0:33	Scenario 2 · Restricted Grant
0:33–0:41	Scenario 3 · Two Workers Quit
0:41–0:49	Scenario 4 · Matching Funds
0:49–0:55	Scenario 5 · The Evaluation (every team calls out its result + final total)
0:55–1:00	Debrief: stand-up votes, 1–2 posters shown. If behind schedule, report only 2 teams per round.

Use the group picker each round so every team reports at least once; rotate speakers inside teams.

Coin math (per team) 硬幣計算

Start 16 (NT$8M) → after #1: 13 → #2: up to +3 (−1 if evaluation < 2) → #3: −2, +2 → #4: −1, +4 if accepted → #5: +1 or −2. Typical final total: 17–20 coins (NT$8.5–10M).

What each scenario teaches 教學重點 (textbook Ch. 8)

Scenario	Concepts	Ask the class
1 · 20% Cut	3Es 經濟／效率／效能; decision-making 決策; prevention is invisible	Who cut prevention? Why is it the easiest to cut? (“When prevention works, nothing happens.”)
2 · Restricted Grant	Funder power; accountability 責信; output vs. outcome; reporting burden	Who decides what your agency does when money has strings? Was any team brave enough to refuse?
3 · Workers Quit	Staffing 任用; supervision functions (supportive 支持性); burnout 職業倦怠	Teams that cut supervision in Round 1: do you regret it? Link to Yu-Ting.
4 · Matching Funds	Contracting-out 契約委外; best value; 自籌款 in Taiwan	Is matching fair to small agencies? Big agencies grow, small ones fall behind.

5 · Evaluation	Accountability 責信; control 控制; why “boring” admin matters	Stand up if you cut Evaluation & reports earlier. What happened?

Edge cases 特殊情況

- A team wants to move a coin: not allowed. Money spent on a line stays there; they can only CUT. (Real budgets work this way within a year.)
- A line reaches 0 active coins: it closes. They write CLOSED 停辦 and must name who loses the service.
- Rent below 2: not allowed; they must cut elsewhere.
- Scenario 3 with only 1 social-worker coin left: cut 1. With 0: the line is already closed; no cut, but they still get the donation.

Final debrief questions 總結提問

1. Stand up if your agency ended with MORE money than it started with. Did more money mean better service?
2. Which line did you protect the most? Which one did you sacrifice? Why?
3. Which decision was hardest? Which E did you use most often?
